PART XII - METHOD OF PAYMENT

- A. Estimates shall be made monthly of the amount and value of the work and services performed by the Architect-Engineer under this contract, such estimates to be prepared by the Architect-Engineer and accompanied by such supporting data as may be required by the Contracting Officer.
- B. Upon approval of such estimate by the Contracting Officer, payment upon properly executed vouchers shall be made to the Architect-Engineer as soon as practicable of 90 percent of the amount as determined above, less all previous payments; provided, however, that payment whenever the Contracting Officer determines that the work is substantially complete and that the amount of retained percentages is in excess of the amount considered by him to be adequate for the protection of the Government, he may at his discretion release to the Architect-Engineer such excess amount.

The Contracting Officer may, if he determines that the estimated construction contract price set forth in this contract is so low that award of a construction contract not in excess of such estimate is improbable, authorize a change in scope of materials as required to reduce the estimated construction cost to an amount within the estimated construction contract price set forth elsewhere in the contract, or he may adjust such estimated construction contract price.
